

6th International Symposium for Farming Systems Design

Martin van Ittersum

Martin van Ittersum holds a PhD in Agricultural and Environmental Science from Wageningen University. He is a professor at the Plant Production Systems group of the same university. His research and teaching focus on research concepts and methods for the analysis, design and integrated assessment of agricultural systems from field to farm, regional and global level. He has led and is leading a large number of (inter)national projects dealing with global food availability, integrated assessment of agricultural systems, yield gap analysis, phosphorus scarcity, climate change and circular food systems. Martin is currently leading the Global Yield Gap Atlas project (www.yieldgap.org) to map the scope for increasing agricultural production on current agricultural land. In 2013 he was the co-chair of the 1st International Conference on Global Food Security and he is co-chair of the 4th edition of this conference to be held in Montpellier in 2020. In 2015 and 2016 he was the interim chair of the Farming Systems Ecology group at Wageningen University. He has authored over 150 papers in international journals and supervised many MSc and PhD students from all continents.
